San Francisco, California | ericskao@gmail.com | 408-315-1501

ericskao.com | linkedin.com/in/erkao | github.com/ericskao

UNIVERSITY OF CALIFORNIA, DAVIS B.S. | 2008 - 2012

Senior software engineer with 10+ years of experience spanning frontend, full-stack, backend, and AI systems. Product builder at HomeLight, Magic Eden, Notion, and startups, with recent focus on LLM-powered workflows, agentic systems, and business process automations. Founding engineer at several web3 organizations.

SKILLS

LangChain, Ruby on Rails, Python, Postgres, OpenAI, Claude, Webhooks, Next.js, React, Typescript, Tailwind, SQL

HomeLight

Senior Agentic AI Engineer | Oct 2024 - Present

- Core engineer for EVA AI - building LLM-powered workflows across mortgage operations, underwriting, & financial automation
- Built Jootie, a platform that reduced bulk update and disbursement workflows from approximately one hour to seconds
- Designed Simplifile & MeridianLink webhooks, automating mortgage recording workflows, eliminating manual steps
- Won company-wide AI Builders Challenge by creating Kudos Bot, an AI-powered Slack recognition system adopted by HR
- Designed agent pipelines incorporating retrieval, workflow orchestration, and human-in-the-loop review

MAGIC EDEN

Senior Software Engineer, Frontend | June 2023 - Jan 2024

- Redesigned core Solana Marketplace and Profile pages, and MagicEden Bitcoin to enhance UX and interface consistency
- Developed new MagicEden homepage as part of company rebrand using NextJS, TailwindCSS, Zustand
- Create and maintain components in UI library as part of the UI Infrastructure team with Storybook

NOTION

Web Developer, Contract | May 2023 - Oct 2023

- Conducted Statsig A/B tests on Notion.so and Notion AI pages to optimize engagement and conversion rates
- Designed Next.js web components to be used in UI/UX changes, resulting in 7% increase in user sign ups
- Optimized page titles and meta tags across website to enhance SEO organic search engine visibility

PROXYCHAT

Founding Engineer | Mar 2022 - Feb 2023

- Developed social web3 Next.js platform to decentralize decision making for DAOs and NFT communities
- Engineered content feed, posting flow, chat, community management components with Tailwind, Redux, and React
- Built voting and governance tools including upvoting, reactions, threads, and grant submissions

ENJOY TECHNOLOGY INC.

Senior Software Engineer | Sep 2017 - Aug 2022

- Developed internal scheduling tools to manage 1k+ employees in 50 different markets in US, UK, and CA
- Gamified initiatives to improve employee sales numbers by over 10% to increase overall revenue
- Integrated Apple, Google, DJI, and Sonos API services to add scheduling widget on checkout pages with GraphQL

ARTIFICIAL IRRELEVANTS

Co-Founder | Sep 2021 - Jan 2022

- Launched NFT platform on the Solana blockchain, raising \$750k+ profit in 1 month (scaling up to 3k users)
- Built client interface to connect user wallets for mint and purchase of NFTs using Web3 smart contracts
- Engineered UI Rarity Tool for calculating statistical rarity and to determine product rankings
